RISHAV DEV

Full-Stack Software Developer

8789075441 | rishavdev2004@gmail.com

linkedin.com/in/rishav-dev26 | github.com/rishavdev01

SUMMARY

Information Science and Engineering student and full-stack developer (MERN, Spring Boot) seeking a software engineering internship. Experienced in building secure, role-based applications with REST APIs, backed by strong DSA, OOP, and DBMS fundamentals. Adaptable team player and proven leader who stays calm under pressure and communicates clearly.

EDUCATION

Dr. Ambedkar Institute of Technology — Bengaluru, Karnataka
Bachelor of Engineering, Information Science and Engineering | Aug 2023 – Aug 2027

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript
- **Full-Stack Development:** MongoDB, Express.js, React.js, Node.js, Spring Boot, Django, REST APIs, Authentication, HTML5, CSS3, Bootstrap
- **Core CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems
- **AI/ML:** Generative AI, Machine Learning, Prompt Engineering, Semantic Search
- **Tools:** Git, GitHub, VS Code, Docker, Kubernetes, Vercel
- **Soft Skills:** Teamwork, Leadership, Adaptability, Communication, Time Management, Problem Solving, Crisis Management

PROJECTS

UPI Without Internet: Offline Payment Mesh | *Java 17, Spring Boot, Thymeleaf, Maven*

- Built a Spring Boot backend that settles UPI payments for senders with no internet: an encrypted payment hops across a simulated Bluetooth mesh until a connected phone uploads it; a Thymeleaf dashboard visualizes the flow.
- Secured packets with hybrid encryption (RSA + AES-GCM) so relays cannot read or modify them; tampered or replayed packets are rejected before the ledger.
- Implemented idempotent settlement via packet hashing so a payment arriving through multiple phones settles exactly once, verified with a concurrency test.

Enterprise Project & Research Management Platform | *React.js, JavaScript, REST APIs* | Feb 2026

- Built a multi-role dashboard in React.js with role-based authentication and secure, permission-scoped access control, so employees, managers, and admins each see only the data they are authorized to access.
- Implemented project tracking, multi-step approval workflows, and an employee onboarding pipeline, replacing manual coordination with a single, auditable interface.
- Connected REST APIs to GitHub for repository/activity visibility and added semantic search to speed up locating projects and records.

AI-Powered Travel Itinerary & Budget Planner | *React.js, Chart.js, Bootstrap* | Dec 2025

- Built a web app that generates budget-aware travel itineraries using an AI recommendation layer driven by user preferences and constraints.
- Added adaptive recommendations that update in real time as trip parameters (budget, dates, destination) change.
- Designed interactive Chart.js visualizations for budget breakdowns to improve at-a-glance decision-making.

Live demo: v0-travel-budget-planner-neon.vercel.app

CERTIFICATIONS

- **Prompt Design in Vertex AI — Google Cloud Skill Badge** (Generative AI, Prompt Engineering, Gemini APIs) — May 2024
- **Certified AI Full Stack Web Development — Apna College** (DSA, Full-Stack Development) — Oct 2025

LEADERSHIP, TEAMWORK & EXTRACURRICULAR

- Trek Captain, Tripper Trails & PTU — led 30+ expeditions, managing logistics, safety protocols, and real-time crisis resolution under pressure.
- Led college teams in planning campus events, coordinating cross-functional volunteers and deadlines.
